Summary

End-to-end product engineer (backend, data, frontend, mobile, architecture). AI platform: agentic workflows, RAG and multi-agent systems.

Skills

- **AI / LLM:** LLM, RAG, Agentic workflows, AI agents, Multi-agent systems, AI platform, AI-first DevEx
- **Backend, data & cloud:** Go, Elixir, Phoenix, Node.js, JavaScript, Java, PHP, GraphQL, MySQL, Postgres, MongoDB, Redis, Cassandra, Kafka, MQTT, Vert.x, AWS, GCP, Docker
- **Architecture & platform:** System design, Distributed systems, Software architecture, Clean Architecture, SOLID, DDD, MVVM, Design Patterns, TDD, Dependency injection, Unit testing, CI/CD, Backstage, Observability (OpenTelemetry, Dynatrace), SDUI
- **Frontend & mobile:** Flutter, Dart, Android, iOS, Android SDK, Fastlane, Angular, HTML, CSS, Animation, SQLite, Hive, Firebase, Bloc, GetIt, Shorebird
- **Leadership:** Technical leadership, People development, Mentorship, Project management, Startups, FinTech

Experience

Senior Staff AI Engineer · AI Platform — Safra — Jul 2026 – Present

- AI platform engineering: agentic workflows, RAG, AI agents and multi-agent systems.

Senior Staff Software Engineer — Kueski — Sep 2025 – Jul 2026

- Prepared application engineering for a platform of more than 10 million users: architecture, dependency governance, cross-mobile initiatives and an AI-first workflow with pipelines, scripts and hooks.
- Built a quality portal in Backstage as a single source of truth for metrics such as module coverage, analyze issues and tooling.
- Code sanitization cut lint and analyze issues by 60%.
- Dependency centralization cut low-quality third-party dependencies by 20% and cold start time by 10%.
- Pub Workspace migration cut conflict-related crashes and pipeline build errors by 25%.
- Added pipeline guardrails, regression-test pipelines and pull request pipeline improvements.

Staff Engineer · Mobile Architecture — XP Inc. — Nov 2022 – Sep 2025

- Built the company's mobile foundation: internal tools, shared components, stack and architecture for teams migrating projects to Flutter.
- Created the learning path for almost 200 mobile developers; structured paths and architecture sessions cut onboarding time by 40%.
- Used Server-Driven UI and orchestration for A/B tests and hypothesis validation.
- Standardized analytics data with pipelines and modular frameworks for cross-platform integration.
- Led architecture decisions on key projects to improve performance and scalability.

Engineering Manager — XP Inc. — Aug 2022 – Nov 2022

- Led project and team management; process changes increased productivity by 30%.
- Mentored the team with feedback cycles and career development plans.

Staff Engineer — XP Inc. · InfoMoney | IM+ — Jan 2022 – Aug 2022

- Improved performance by 25% with modular navigation and reusable components.
- Planned and executed the migration of native Android and iOS applications to Flutter.
- Structured a design system used across more than 10 brands.
- Reduced development time by 20% with scaffolding tools and architectural templates.
- Delivered A/B testing and dynamic releases without a store dependency, with analytics and tracking in the architecture.

Head of Mobile — Remessa Online — Oct 2020 – Jan 2022

- Set architecture and technical decisions and led the product's technical evolution.
- Built and ran the mobile area: team formation, guidance and delivery.

Mobile Specialist — Remessa Online — Oct 2019 – Oct 2020

- First mobile developer at the company: defined the architecture and built the app.
- Set up the mobile area, which did not exist before.

Flutter Consultant — Sciensa — Aug 2019 – Oct 2020

- Consulting for companies migrating to Flutter or starting product development with it.

Consultant — Accenture — May 2018 – Aug 2019

- Reference architectures for high-performance, scalable, highly available backends for global clients.
- Go, Node.js, JavaScript, Java, Angular, MongoDB, Redis, Cassandra, Kafka, Vert.x and MQTT.

Senior Software Engineer — NeoPag — Nov 2017 – Mar 2018

- Designed the backend of a financial product from scratch, including team setup and technical decisions.
- Elixir, Phoenix, MongoDB and Postgres.

Back-end Developer — Easy Carros — Oct 2016 – Nov 2017

- Backends for a growing startup: Node.js, GraphQL, MongoDB and Go, with scalability and reliability as the constraint.

Software Architect & Engineer — Like Online — Semi-remote — May 2016 – Oct 2016

- Rebuilt the backend of startups OneFits and GoAhead, including the technical decisions. Semi-remote.
- Node.js and MongoDB, then Go for performance.

Full Stack Developer · first job — Alphacode IT Solutions — Remote — Apr 2015 – Oct 2015

- Full-stack delivery on several products, mainly e-commerce with PHP, MySQL, HTML, CSS and JavaScript. Remote.
- First employee at the company.

Education

- **Business Management** — Fatec São Bernardo do Campo Adib Moises Dib — 2024 — 2027
- **IT for Business** — Fatec São Bernardo do Campo Adib Moises Dib — 2023 — now
- **Technologist in Systems Analysis & Development** — IFSP — 2015 — 2016
- **English** — Wise Up — 2017 — 2018
- **IT for Internet Technician · IT Technician** — ETEC — 2013 — 2014
- **Digital Games Programming Technician (not completed)** — ETEC — 2015
- **Webmaster** — Alpha Brasil — 2012 — 2013
